

Lesson: Practice 2

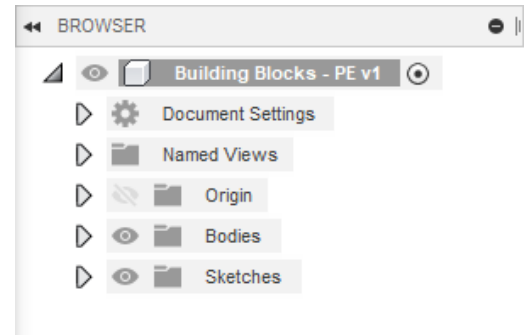

Practice: Upload a file to the data panel and identify bodies and components.

- Upload a design to the data panel.
- Explore the design browser.
- Identify bodies and components.

1. Expand the project in the data panel called “Practice Assignments” and the sub-folder called “Course 1” and upload the file “Building Blocks – PE.f3d”.

2. Explore the browser and look for bodies and components.

3. Expand the bodies folder and note that the file contains only bodies and no components.
